LinkedIn · GitHub · Upwork

Full-stack engineer with **5+ years building and owning production web platforms as a long-term independent contractor**. I take products from architecture through deployment to growth — most recently building a trading-analytics SaaS from zero to 10,000+ users. Deep in Python (Flask/Django), React/Next.js, real-time systems, and AWS, and equally comfortable with modern AI-assisted tooling and hands-on, first-principles engineering.

**10,000+**

USERS ON A PLATFORM  
BUILT FROM SCRATCH

**1,944**

PAYING  
SUBSCRIBERS

**~4 yrs**

LONGEST SINGLE  
CLIENT ENGAGEMENT

## EXPERIENCE

### Independent Software Engineer — Freelance / Contract · 2022 – Present

Concurrent long-term contracts with multiple clients, each managed as a dedicated independent engagement.

#### Supertrader — Senior Software Engineer

Jan 2025 – Present

Trading-analytics SaaS that helps traders track trades, analyze performance, and draw insights · supertrader.me · Berlin, Germany

- Architected and built the platform **from scratch**; grown to **10,226 registered, 4,048 active, and 1,944 paying subscribers** (Jun 2026).
  - Replaced costly third-party MT5 packages with an **in-house trade-connection handler**, removing the external dependency and its recurring cost.
  - Integrated **Stripe and RevenueCat** with webhook-driven billing for the full subscription and payment lifecycle.
  - Provisioned and manage **Windows Server (IIS, NSSM)** and AWS infrastructure, actively optimizing cloud cost.
  - Mentor developers across a 10-person team and own resolution of infrastructure and customer-facing technical issues.
- Stack: Next.js · Flask · AWS · Windows Server · Stripe · RevenueCat

#### Nexgen Enterprises — Software Developer

Sep 2022 – Jun 2026

Land-surveying company; built and maintained the Field-to-Finish (FTF) SaaS platform for survey operations · Florida, USA

- Retained as **1 of only 2 developers** (from a team of 5) through a company restructuring — kept for performance and communication across nearly **4 years**.
  - Built and owned the platform's **real-time chat infrastructure**: a fully custom Socket.io server and event system that replaced an external provider — **cutting chat response/setup time ~50%** and removing **100% of third-party messaging cost**.
  - Processed survey-order data **at scale** — **millions of rows** across multiple Salesflow clients — powering operational and reporting workflows.
  - Delivered a **job-board module** letting field crews bid on available jobs within the workforce-management suite.
  - Developed an **MCP server** for the platform, enabling AI tools to interface directly with the system's data and operations.
- Stack: Python · Flask · Socket.io · MySQL · AWS · Google APIs · Ubuntu · Jinja2 · cron · Git · Jira

#### Deben Media — Software Engineer (Part-time)

Jan 2024 – Present

New York, USA

- Build and maintain **Flask** web applications with Dockerized deployments and hands-on server management.
- Run **data-analysis workflows** (Pandas, NumPy, Jupyter) that turn scattered raw data into meaningful insights.

#### Qwego — Frontend Developer

Jun 2023 – Jan 2024

Startup building a platform for freelancers · qwego.com · Greater Houston, Texas

- Sole frontend engineer** on the product, building the application in AngularJS.

#### MigArch Pvt. Ltd. — Software Engineer

Mar 2022 – May 2023

Vadodara, India

- Maintained and extended two products (**Migmayo, Sqft**) — features and bug fixes across Flask, Angular, and MySQL.

#### Octal Knot Pvt. Ltd. — Software Developer (Intern)

Apr 2020 – May 2022

Australian accounting-outsourcing firm building internal products and client websites

- Built features for the **Wiseaudits** website and an **SMSF audit platform** (Python, Django, JS, React) alongside B.Tech studies.

## TECHNICAL SKILLS

### Backend

Python · Django · Flask · Jinja2 · REST APIs · Socket.io / WebSockets

### Frontend

React · Next.js · AngularJS · JavaScript · jQuery · HTML · CSS

### Data

MySQL · PostgreSQL · large-scale data processing · Pandas · NumPy · Jupyter

### Cloud & DevOps

AWS (EC2, S3, RDS, Lambda, Amplify) · Docker · Ubuntu · Windows Server (IIS/NSSM) · cron · deployments

### Integrations

Stripe · RevenueCat · Google APIs · Webhooks

### Tooling & AI

Git · Jira · Cursor · Claude Code — with strong manual, first-principles development

## EDUCATION

### B.Tech, Computer Science

2018 – 2022

Indian Institute of Information Technology (IIIT), Vadodara

Senior Secondary (12th) — CBSE Board

90.4%

Secondary (10th) — RBSE Board

92.83%

## LANGUAGES

English — Fluent · Hindi — Native

## RECOGNITION

Consistent **5.0 star client rating** across long-term freelance engagements — noted for clear communication, reliability, and problem-solving.
